Avery Chen

Data Analyst

avery.chen@example.test | +61 400 000 000 | Sydney, Australia

PROFILE

Fictional data analyst with experience turning operational data into clear reports, dashboards and evidence-led recommendations. This document is a privacy-safe demonstration sample for the Lens application.

CORE SKILLS

Python	**SQL**	**Excel**	**Tableau**	**Statistics**	**Pandas**	**Data visualisation**	**A/B testing**

EXPERIENCE

Data Analyst — Northstar Analytics | 2023–2026

- Built SQL reporting pipelines and Tableau dashboards for service-performance reviews.
- Analysed customer cohorts in Python and presented measurable trends to stakeholders.
- Designed A/B-test summaries that improved clarity of product decisions.

Reporting Assistant — Harbour Insights | 2021–2023

- Automated Excel reporting and reconciled weekly operational datasets.
- Produced data-quality checks and concise visual summaries for project teams.

PROJECTS

Customer Retention Dashboard. Created a fictional portfolio dashboard combining SQL extracts, Python transformations and Tableau visualisations.
Experiment Review Toolkit. Built reusable templates for analysing A/B-test outcomes and communicating statistical results.

Fictional demonstration resume — contains no real candidate information.
